Job Title	TEDDS Development Engineer
Job Location	Illinois
Education Required	A Masters degree in Structural or Civil Engineering
Experience Required	5 or more years practical design experience to a competent level within a consulting engineer A real desire to work with structural engineering design software
Job Description	<p>Structural Engineers - Something just a little different?</p> <p>"When I realized that most of my time was spent managing and not designing, I knew I was ready for a change. What I really wanted to do was to get into the depths of design but I didn't think a software house would offer me that – how wrong I was!</p> <p>It's a different world; I'm using my engineering skills more than ever – an engineer's job at the forefront of the industry and knowing so many building structures are affected by what I do here.</p> <p>I'm helping develop new calculations for multiple materials and codes. I'm working with a very successful team and always feel that I am an important part of CSC. I'm really using my brain again – taking the codes and design guides to pieces, filling in gaps and handling the more challenging, detailed engineering than I could only ever have dreamed of."</p> <p>TEDDS Development Engineer, CSC</p>
Compensation	Negotiable
Job Contact	Please send your resume and covering letter to recruitment@cscworld.com quoting "TEDDS Development Engineer"
About the Company	<p>CSC was established in 1975 and has subsequently built an enviable reputation for providing high quality software solutions and associated technical support and training for Structural Engineers.</p> <p>CSC now employs over 70 staff worldwide with regional offices in Australia, Malaysia, Singapore, UK and USA. In addition to our regional offices, CSC is also establishing a growing network of resellers for targeted geographic markets.</p> <p>Our software portfolio continues to evolve as we invest more and more time and money in new research and development projects for the benefit of our customers. CSC believes in a "suitability for purpose" development strategy. Rather than providing one product that purports to do all and actually does nothing very well, our software portfolio is modular, thereby providing easy to use and comprehensive solutions that meet our customers' specific requirements.</p> <p>Find out more about us at www.cscworld.com</p>
